

Test	Feature Tested	Firefox	Chrome	IE	Notes:
1	Reach site without error	Passed	Passed	Passed	Homepage pictures are sideways
2	Navigate without error	Passed	Passed+	Passed	* +Under blogs, there is a 'Previous Article' and a 'Next Article'. There are currently only two articles, when the website is up and running will there be an article that has both of these options listed?
3	No comments left on blog pages	Passed	Passed	Passed	No comment section available when not logged in
4	Reach Mooshak without error	Passed	Passed	Passed	Suggestion: Have an easy way to navigate back to webpage away from Mooshak if clicked on by mistake
5	Log in to Mooshak	Passed*	Passed+	Passed	*When typing in user/pass to Mooshak, error of the connection not being secure pops up and that login information could potentially be compromised +Able to log in to Mooshak, unsure what a student would see. Was greeted by confusing Enki tutorial, text a little difficult to see due to color. I'd say a little difficult to navigate, but if you have the time to play around with it, students will eventually figure it out
6	Test administrator access for DjangoCMS and add content	Passed	Passed	Passed	N/A
7	Test administrator access for Mooshak	Passed	Passed	Passed	Creates separate page for mooshak, can't navigate back to website
8	Test judge access for Mooshak	Passed	Passed	Passed	Creates separate page for mooshak, can't navigate back to website
9	Access the VM	Passed	Passed	Passed	
	* Doesn't have test case for Safari browser
